DAY 3

DICTIONARIES
- x = {"aditya": 5, "dan": 6}
- Can easily append
  - x["alex"] = 9 → {'aditya': 5, 'dan': 6, 'alex': 9}
- Can have complex dictionaries
  - Y = {"aditya": ["height": "6", "age": "20"], "alex": ["height": "6", "age": "21"], "dan": ["height": "5", "age": "19"]}
  - x = {"sujit": ["pineapple", "mushrooms", "olives"], "bob": ["spinach", "apples", "chicken"]}

URL BUILD
- Header
- Query arguments
  - ?val1=6&val2=7
- URL parameters
  - Specify what EXACT object we are operating on
  - Ie /restaurants/sushi/reviews → We are looking at the reviews at of the object sushi which is a restaurant
- Body

```
{
        "Name": "sujit"
}
```

ERROR POSSIBILITIES WHEN CREATING dictionaries
- Missing commas
